# Tips

Watch the Day 3 Challenge video for explanations and examples of these tips.

1. Start with an idea of the overall sound you want.
2. Preview sounds with cells.
3. Match the instrument to the range of the cell.

4. Think about the roles of synths.

5. Think about high-low spread.
  6. Think about foreground and background.
  7. Change loudness over time.
